

## **M30875: WebMD Coursework - Travel Agency (up2244885)**

### **Planning Evidence**

The targeted customers of the company are young, energetic, low to mid income, and interested in a variety of outdoor activities such as surfing, snorkelling, hiking, and cycling. The brand image therefore is young, stylish, and minimalist.

The WP Engine website has analyses and given examples about the colours scheme, “What if your audience is younger? A visually interesting web colour palette that is bright and playful will help them stay engaged. The content of the site will also need to be engaging, but colour will play a big role.” (WP Engine, 2023, para. 16). Colour is a very important key to attract the audience and create a sense of belonging. It also suggests that “Blue: This colour is associated with water, and provides a feeling of calmness and serenity. Blue creates a sense of security and trust, and is often used for corporations”, and “Brown: Friendly, earthy, and commonly represents the outdoors”.

The website demographics for gender distribution is neutral, the age distribution is largely on the age of 18 -24 (22%), 25-34 (38%) and 35-44 (32%), while 65+ is only (1%). The UX design will be based on the user preferences and trend, enlarged font size is not necessary, and mobile/tablet design is at higher priority.

According to Sarah Titus’s analysis on “25 Best Travel Destinations Color Palettes”, a blue based palette extracted from a coral reef in Figure 1, inspires the colour theme which matches the company direction and the customers’ age.
